THE SO-CALLED ERA OF THE RENAISSANCE OF HISTORY

Larned Includes it in His Fourth Epc. h

Larned's division of all History into aix great epochs is logical as well as interesting. His fourth epoch is one of this greatest of all historical erag. In that period, for instance, appear fautenberg, the inventor of printing; Columbias, who discovered a new world; Coparmions, who first demonstrated that nour earth was a natellite of the sun, Keplon, who learned the series of the planets, and formulated the laws of their movements; Gallieo, who naticipated the methods of modern science, Cervantes, who wrote one of the world; not known before, Loyola, who founded the great order of the Jesuits; Luther, who wrought a chings in the religious feith of Europe; and Shakespeare, perhaps the mightlest human intellect the great names treated of by Larned in his fourth epoch, which, it may seem girange, did not produce a single military gonius of the first order. There can be no quastion that Larned's History of the World, now being distributed to the readers of this paper, is the greatest of its kind, and should be in every home in the country. His description of his fourth epoch, alone, is well worth the small distributing cost asked, and the coupons uppearing daily in these column should be cut out without delay and presented at this office—Advertisement.

How to Neutralize Dangerous Stomach Acids

Pew people besides physicians realise the importance of keeping the food contents of the stomach free from scul fermentation. Healthy, normal digestion cannot take place while the delicate lining of the stomach is being inflamed and distended by acid and wind—the result of fermenting food in the stomach. To secure perfect digestion, fermentation must be stopped or prevented and the acid neutralised. For this purpose, physicians recommend getting a little bisurated magnesia from the druggist and taking a tenapounful in a little hot or cold water immediately after esting. The Lyric company, under the management of Joseph Glass, presented "The Spendthrit" as its opening bill in El Paso and gave El Paso as good a stock company show as has been sen here in several years. The players are headed by Bert C. Gagnon, who has appeared in El Paso during previous seasons at the head of his own company and under the direction of Mr. Glass. He is the same polished actor and his work has a finish that is seldom seen in stock companies. As Richard Ward, the bankrupt husband of a spendthrift wife, Mr. Garnon does not over act, he looks the part and creates a real person on the stage. Miss Edith Pollock, the leading woman, appeared in the name part. Opposition Picking Men.

The County and City Democratic ciub, composed of the men who are planning to oppose the "ring" at the city election, is also considering its candidates for the city offices who will appear on the ticket next spring. A meeting of the executive committee of this club was held Monday evening in the Coles block to consider candidates whose names will be presented at the next meeting of the ciub.

A. P. Coles, one of the most active members of the County and City club, is being seriously considered as a candidate for mayor against the "ring" ticket. Charles Davis is another man whose name has been considered for the position of chief executive. Judge Dan M. Jackson and judge J. M.
